

Stella Gonçalves Mendonça

São Carlos, SP, Brazil | +55 (16) 98189-0296 | stellagmendonca@gmail.com | LinkedIn: linkedin.com/in/stella-goncalves-mendonca | GitHub: github.com/stellag2003

Professional Summary

Systems Analysis and Development student with experience in web development and building API-integrated applications. Skilled in JavaScript, TypeScript, React and SQL, working on interface development, data handling and client-server integration. Familiar with version control (Git), development best practices, clean code and agile methodologies. Looking to grow in building scalable, high-performance, user-centered applications.

Education

Systems Analysis and Development (Technology Degree) – Unicesumar
Expected graduation: 06/2027

Full Stack Web Developer Program – Programadores do Amanhã 08/2025 - 08/2026

Technical Skills

TypeScript | Node.js | Angular | React | Linux | Git | SQL | AWS

Professional Experience

Full Stack Developer

Prosol Informática – São Carlos, SP
10/2024 – 07/2025

- Developed and maintained a tax invoicing system using C#, PHP, Laravel, JavaScript and MVC, reducing maintenance time by 30%.
- Optimized PostgreSQL databases and REST APIs, reducing response time by 25%.
- Built forms and web interfaces, increasing operational efficiency by 20%.
- Ran tests and maintained reports, contributing to 20% fewer failures and 30% faster data extraction.

Projects

DevFlow – Your Productivity Becomes XP | 04/2026 - 05/2026

- Gamified productivity app that turns study sessions into XP, levels and achievements, with a Cyberpunk/Retro theme.
- Built an interactive, responsive interface with React, TypeScript and Vite.
- Implemented a Pomodoro system, XP progression, unlockable mentors and a history of tech pioneers.
- Integrated with an API to persist users, progress and mentors, using Axios and JSON Server.

- Repository: github.com/stellag2003/DevFlow

Hero Task Manager – To-Do List | 01/2026 – 02/2026

- A **gamified** superhero-themed to-do list, designed to make organizing tasks more interactive and engaging.
- Full stack application built with Node.js, Express and SQLite.
- Implemented CRUD operations and client-server integration.
- Data handling and dynamic interface updates via API.
- Designed the visual and interactive experience with a focus on usability and engagement.
- Repository: github.com/stellag2003/MiniProjeto_M3

Licenses & Certifications

- Systems Programmer and Programming Logic – Transforme-se Serasa (200h)
- Escola da Nuvem – Cloud Computing Fundamentals (AWS re/Start) (300h)
